Company Profile
2017

WELCOME

Discover, Zartner Technology, a company which strives to simulate the growth of your business by bringing together people, technology and business through our services and products.

Our vision arises from the belief that potential is unlimited. We see Africa as a frontier for stretching potential by effectively applying our core Web-driven software application development capabilities to grow and help businesses realise their full potential in Africa.

OUR HISTORY

Our company, Zartner Technology, began in April 2012 with the intention of offering Software Development Services and Products to South African Small to Medium Enterprises.

Our company has grown exponentially since as we realize that IT is major enabler to business and that our services and products play a large role in helping businesses realise, release and stretch their potential. We have since helped numerous organisations stretch their capabilities through our products and service offerings.

WHO WE ARE

Zartner Technology is a Software Development Company which offers a well thought out range of software products and services aimed at helping your business stretch its potential. We have a wealth of knowledge in Software Development using Microsoft Technologies and are confident that we will help you with a software solutions which suit both your business expectations and budget.

WHAT WE DO

We want to help you by using our wealth of knowledge in Software Development using Microsoft Technologies. We are confident that we may help you with software solutions which suit both your business expectations and budget. What we offer is:

- **Custom Software Development**

We will work with you to produce software solutions tailored to your specific requirement. Whether you are a start-up or an established business, we will be happy to assist you at any and every stage of the software development life cycle: from conceptualization, business analysis and prototyping to the development and deployment of a complete solution.

• Own Product Development

The Zartner Technology own product development service is our answer to addressing the common requirements which exist amongst our various intended foreplanned targeted client organisations. We have a range of internal software solutions which we have developed to service specific common needs.

• Software Solutions Partnering

We will partner with you to produce software solution(s) which we will co-manage with your company. Zartner Technology looks for strategic partnerships with well-established organisations which offer a specific product or service in an industry that can benefit a lot from the use of information technology.

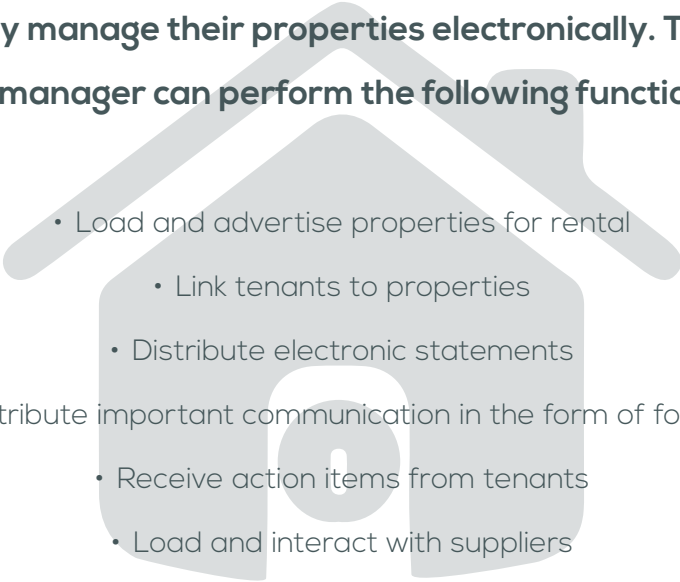

OUR OWN PRODUCTS

Zartner Technology has instead created an environment in which all our targeted clients can share in the cost of developing, maintaining, marketing and hosting the respective application. The products we have developed include:

ServiceIQ makes it easy for your company to perform the following functions:

- Communicate effectively
- Request services and track service delivery
- Find new clients and service providers
- Maintain a successful and cost effective help desk
- Improve customer service

Estate Central is a solution to making it easy for real estate owners and managers to effectively manage their properties electronically. The owner or manager can perform the following functions:

- Load and advertise properties for rental
 - Link tenants to properties
 - Distribute electronic statements
- Distribute important communication in the form of forums
 - Receive action items from tenants
 - Load and interact with suppliers

Rabaki Online Store is a solution to your business if you are in the local retail industries and have a need for an e-commerce platform for buying and selling products. The features of this solution is:

- Order taking and invoicing
- Voucher mechanism for discounting
- Email newsletter for constant communication
- SMS integration for instant communication and reminders
 - Video Download for information sharing
 - Admin logging for tracking and monitoring
 - Inventory management

WHAT TECHNOLOGIES WE USE

We use technologies that help us to deliver effective solutions to your business:

•Microsoft .net framework (C# and VB.NET)

Zartner Technology uses the powerful Microsoft .net technology stack to build rich mobile, desktop and web applications that run on all devices and servers.

•ASP.NET MVC

ASP.NET MVC is a powerful Microsoft technology design pattern that allows Zartner Technology to build powerful, pattern-based web applications that enable a clean separation of concerns and gives us a full control over markup for agile development.

•MS SQL Server

SSRS is one of the powerful features available in the MS SQL server suite. It is a server-based software system that allows us to create, deploy and manage stunning cloud-hosted reports that can be viewed on PCs and mobile devices.

•Bootstrap

Bootstrap is the most popular HTML, CSS, and JS framework for developing responsive, mobile first projects on the web. It allows for faster and seamless web development that efficiently scales your websites and applications with a single code base, from phones to tablets to desktops with CSS media queries.

EXECUTIVE TEAM MEMBERS

Mr Khashane Motloutsi - General Manager

Khashane Motloutsi is the Co-founder and General Manager of Zartner Technology. He is responsible for defining the vision behind the organisation as well as ensuring that the organisations growth is in line with its vision and core values. As an Information Technology graduate, Khashane started his career in Operations and gradually moved into Project Management at First National Bank.

Khashane also holds an Advanced Diploma in Project Management with Cranefield College.

He has worked on numerous strategic Infrastructure Projects within the bank ranging from Telco Service Connectivity to Network Re-engineering and relocation. Khashane is responsible for ensuring that Zartner grows in an organic manner without compromising its vision and values. He is responsible for the conceptualization of new own-product initiatives as well the management of all company projects. Khashane is also responsible for talent acquisition and the day to day steering of the organization. On his spare time, he enjoys spending time with his family, reading, traveling, spending time at the gym and working on his personal development.

Mr Maxwell Maake - Technical Implementations Manager

Maxwell Maake is a Co-founder and Technical Implementations Manager at Zartner Technology, and is responsible for general software development, solutions architecture and strategic decision making at the company. An experienced mobile, web and desktop applications developer, team lead, software architect and microsoft technologies enthusiast. Maxwell Maake is an analytical thinker, a self-driven and motivated person. With a B.Sc degree in Computer Science, Maxwell is also a Microsoft Certified Solutions Developer and a Microsoft Certified Professional.

Team-work, commitment, loyalty, respect and confidence are what drive him. He likes challenges and always goes the extra mile to find solutions. "Working as a Software consultant requires not only an analytical and problem-solving mindset, but also being a great team player. This is where I excel and have proved it by working on and successfully completing various projects with different teams across different technologies. ", Maxwell said. On a good day, you will find Maxwell busy coding on his laptop. On an average day, you will find him reading up on new technologies or engaging on the best technologies available on the market. Occasionally you will find him on the golf course

Mr Phathuxolo Mboyiyana - Research and Development Manager

Phathuxolo Mboyiyana is a co-founder of Zartner Technology and Research and Development Manager he is responsible for new developments and the conceptualization of future ones. With a vast knowledge in a variety programming languages and tools he finds himself looking into the latest technologies in order to prototype and implement cutting edge software solutions. Holding a Degree in Computer Science and Information Technology from the University of Kwazulu Natal he has worked for one of the leading financial institutes as a software developer. Having been a Chess Champion in his younger days he has since converted the skill for use in analysis of all future innovative solutions and in-house initiatives.

Mr Larry Kgatle - Public Relations Manager

Larry is a highly experienced Public Relations manager who has more than four years of experience in the corporate sector in a variety of positions specializing in Internal and External communications, social media management, crisis communications planning, crisis communications response and crisis recovery as well as media relations and marketing communications. Larry engages in the development and execution of effective strategic and tactical plans for external and internal communications.

He's a graduate of the University of Limpopo and has a Bachelor of Arts in Communications Studies. Larry's past experience includes working with National Film and Video Foundation, South African Film and Television Awards, Ithuba Holdings (The New Lottery Operator), Limpopo Office of the Premier and MultiChoice Africa Corporate Affairs. On his spare time, he enjoys chilling with friends on outdoor activities, playing Playstation, spending time with family and reading industry news.
